

APT, spol. s r.o.

So far, we are the only company in the Czech Republic who have built three hydrogen filling stations.

We are meeting our goals in the field of decarbonisation and low-emission transport

Tiny Hydrogen Refueling Stations

We offer:

- **small HRS depots, designed for company fleets, service organizations, sales organizations, innovation centers and/or small shipyards**, are built with costs that are only a fraction of the public station price,
- slow refueling stations without cooling systems and with optimized demands on supply energy,
- stations, supplied with all required functional technological parts, including construction parts,
- services, which also include negotiations with concerned state administration bodies and processing of building permits,
- complex deliveries, ended up by commissioning under the consent of the inspection authorities, included operators training and putting the station into operation with the actual refueling of vehicles,
- the project lead time is approximately one year from the approved and negotiated order,
- for the season 2022 to 2024 the APT, spol s r. o. company offers following basic sets of small hydrogen filling stations:
 - output 18 kg of hydrogen / day filling pressure 350 bar or 700 bar,
 - output 40 kg of hydrogen / day filling pressure 350 bar or 700 bar,
 - output 100 kg of hydrogen / day filling pressure 350 bar or 700 bar,station operation is supported by telemetry and remote access to the control system.
